

Simple / Effective / Networking

Developed as a result of 18 years of being involved in and helping to manage Networking Groups, **refur** has been designed to make things easy, without clutter getting in the way. It is packed with simple and practical tools to help you and your membership to become more effective networkers.

Having a website to promote your group is a great way to promote your group to visitors, but who keeps it up to date, and what if someone leaves, are they still on the site?

Who is tasked with recording of your groups activity? Do they spend hours trying to record referrals sent and received?

Wouldn't it be great to be able to send referrals easily from your cell phone?

Refur is changing how networking groups operate. By making administration easy, sending referrals easy and by giving a focal point for the promotion of the group, **refur helps your chapter to thrive.**

The system costs \$500 per year for your group to use, but that is less than every member buying just four cups of coffee per year!

If you would like to know more take a look at **refur.com**, have a talk with your group, and then your group can sign up for a free trial.
